## Projects

○ 2019 - 2022

### Automatic Temperature Sensor

Automatic Temperature Sensor is an important application used in almost all modern gadgets and smart homes. The System for controlling temperature automatically is achieved by using Arduino Uno-based microcontroller System. Arduino Uno due to its increased popularity find its varied image of applications. Temperature sensor LM35 and Arduino Uno are the temperature is displayed on LCD display employing A1 pin of hardware with the help of analog pin.

○ 2017 - 2019

### Water Level Controller

Water Level Controller is for filling the Water Tanks have been done through electrical pumps in the recent.

However, untimely turning off the motor pumps lead to less filled tanks or over flown water from the tanks causing wastage. In order to avoid such situations we can have an electronic water level controller which can monitor the water level and switch the motor pump accordingly.

This device has two level indicators which work in harmony of a power switching relay.

I'm Margarita Perez, Digital Marketing Specialist with 4 years experience. I'm specialist in handling and managing day to day team operation with considerable experience to read trends.
